

What can be customized?

- Webpage background color
- Background image of the game area
- Spell area background color
- Change the dragon to another creature
- Color and size of the text content
- Border width, style, and color
- Button colors and size

Change the border width, style, and color of the game area.

```
12 #cave {
```

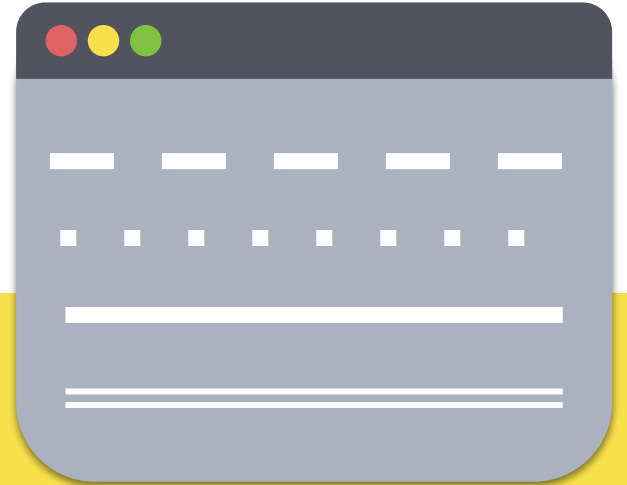

```
19 border: 5px solid #ffffff;
```

Change the border of the spell
area:

```
43 #message {  
44     background-color: #000000;  
45     border: 5px solid #ffffff;
```

When styling a border in CSS, there are many border styles you can use!

Change the border style from **solid** to another style!

```
border: 5px dotted #ffffff;
```

```
border: 5px dotted #f8e04b;
```

```
border: 5px dashed #f8e04b;
```

```
border: 5px double #f8e04b;
```
